Web designer onemanandhisdog.net uses web developer miggle.co.uk's content management system to launch the James' Driving School website

Place/Time/Date: Brighton & Hove, UK, 11am, 2nd July 2008
FOR IMMEDIATE RELEASE

Web design and development agency miggle.co.uk are proud to announce the launch of the brand new website for James' Driving School, Tunbridge Wells - www.jamesdrivingschool.com.

James' Driving School was built by web designer onemanandhisdog.net using web developer miggle.co.uk's Responsive Website Solutions, including our user-friendly content management system.

Our content management system has already been used by another marketing agency to roll out dynamic, accessible websites for their clients, and is recommended to all agencies and website designers looking for an easy, search engine optimised (SEO) web development solution that is straightforward for clients to update.

James of James' Driving School said,

"I found the miggleCMS really easy to use. It's great to be able to make changes to my website myself, rather than have to wait on a designer. My new site works so much better on Google too and I've already got customers from it."

Alick of miggle.co.uk said,

"Our content management system, miggleCMS, is simple to use, yet produces powerful results. We're really pleased to hear how our CMS has got James' site onto the first page of those all-important Google rankings and helped him manage his growing online business."
